Re: Renovations at 3507 Maclay Blvd. For Kids Pointe and Fashion Pointe

Dear Sutton:

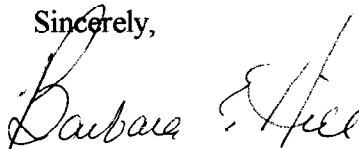

I retained your company to remodel a restaurant into two retail stores and add additional space to the existing building. The finished product was well constructed and looked the way I envisioned it.

You and your associates were very cooperative and worked with me in designing a building that was consistent with what I wanted. We changed the design during the buildout process and made some improvements that I decided I wanted during the construction. The architects were helpful and worked out some of the "kinks" so that the end product had more improvements and created better uses for some of the space. Those changes worked out very well and required creativity to find the best solutions.

The construction of the building was well done. There was attention to the detail of the construction and the way building was put together and flowed. Most of that I relied on you and your staff to take care of and I felt the finished product reflected that attention in a positive way.

Please feel free to use this letter as a recommendation and let your clients know that I would be available to talk to them at the numbers listed above if they have questions.

Sincerely,

Barbara E. Hill
