To Whom It May Concern:

In January 2007 I assumed the office of Clerk of the Circuit after being elected in November of 2006. Among the many duties of my job I inherited a rather large project that had just finished the planning stages. This project involved the total interior demolition and renovation of several former Jefferson County High School buildings to be used for County Offices as well as a new Courthouse Annex Building. I have to admit I was a bit apprehensive when tackling the task of overseeing this project because of the strain of learning other parts of my myriad of job duties. It was because of the team of Riley Palmer Construction and MLD Architects that eliminated and put to rest any fears I had over this project.

Representatives from the team of professionals were always on hand and informative during every phase of construction. They were always willing to meet with me each time I visited the site, which was almost on a daily basis. During these visits they would walk me through any issues with the project and give me a status of where we were with our schedule. There is also something to be said about the great working relationship that Riley Palmer Construction has with the architectural team of MLD Architects. They seemed to always be on the same page and Randy Lewis and his team were always just a phone call or visit away from explaining any design issues we had.

Because of the professionalism and attention to detail, as well as the informative nature of work they performed for us, I would highly recommend Riley Palmer Construction Company and MLD Architects for your project. They have helped provide Jefferson County a great government complex that meets the needs of our citizens.

Sincerely,
