Jefferson Senior Citizens is a non-profit, tax exempt organization who's primarily mission is provide preventive services to the 60+ population who have been determined to be economically and/or socially deprived and/or functionally impaired. Our purpose is to satisfy the basic needs for self support and to coordinate all necessary home and community based services to delay or prevent premature institutionalization.

To Whom It May Concern:

In April 2007 we selected Riley Palmer Construction Company (RPCC) as our design/build contractor for our new facility. Their services provided both design programming, budgeting, and construction of a 6800 square foot multipurpose building for our Seniors. The building includes a full service commercial kitchen, medical suite, dementia care center as well as social areas for our Seniors. RPCC will deliver our building in early July for the original budget of \$ 1,070,812.00 despite funding for our project being delayed for over two years.

The design/build process recommended by RPCC reduce our timeline from design to completion and enabled us to meet our deadlines for both state and federal grants. Additionally, the single responsibility for design and construction eliminated the possibility of our project exceeding our budget. Throughout the process, the RPCC team carefully led us through the steps making sure all of our needs were met while making sure we stayed within the guidelines at both the state and federal levels.

Without hesitation, I highly recommend RPCC for consideration of your project. Mr. Palmer and his staff carefully guided us from concept to completion and we are excited about occupying our new facility. Please don't hesitate to call me with any questions regarding the design/build process or any additional information regarding their firm.

Sincerely,

Bobbi Krebs,
Executive Director
